### I Peccati di Ciacco Cundiun Ligurian Vegetable Appetizer

This unique condiment reflects traditions of both the coastal Riviera Ligure region and those of the verdant yet lesser-known hills behind it, and includes classic ingredients such as tomato (sun-dried), capers, and anchovies, but also aromatic mushrooms indigenous to the rustic interior. Italians often refer to this dish as *monti e mare*, or “mountains and sea” referring to the mixed geography of the Italian peninsula. Traditionally, cundiun is served over crackers, but is great with crusty breads and alongside soft goat cheeses.
