Piranske Soline Salts

"Salt is the sea that could not return to the sky"

This all-natural sea salt is harvested by hand on the Adriatic coast in Piran, Slovenia - a protected coastal area that has particularly high natural salinity. Dried and purified in the Mediterranean sun, and rich in minerals, this distinctive salt has an outstanding flavor which is slightly sweet and not at all bitter.

Fior di Sale: The purest and most precious salt of the harvest. "Salt Flowers" are excellent for finishing dishes.

DOP Coarse Salt: Rich, but not aggressive or bitter. This coarse, dense salt is best for brining, grinding and blending.

Traditional Bulk Sea Salt: A high quality, economically priced salt that is versatile for daily cooking needs.
